In Titles and Forms of Address, 21st ed., pp. This can still be seen in reprints of the 1611 edition of the King James Version of the Bible in places such as Romans 15:29, or in the Mayflower Compact. Merriam Webster Online Dictionary. During the latter Middle English and Early Modern English periods, the letter thorn (þ) in its common script, or cursive form, came to resemble a y shape. For the band, see The No.1s. It is the letter þ with a bold horizontal stroke through the ascender, and it represents the word þæt, meaning "the" or "that" (neuter nom. In 1916, Legros & Grant included in their classic printers' handbook Typographical Printing-Surfaces, a proposal for a letter similar to H to represent "Th", thus abbreviating "the" to he.[15] In Middle English, the (þe) was frequently abbreviated as a þ with a small e above it, similar to the abbreviation for that, which was a þ with a small t above it. The word "The" itself, capitalised, is used as an abbreviation in Commonwealth countries for the honorific title "The Right Honourable", as in e.g. "The Earl Mountbatten of Burma", short for "The Right Honourable Earl Mountbatten of Burma", or "The Prince Charles".[16] References

The, as in phrases like "the more the better", has a distinct origin and etymology and by chance has evolved to be identical to the definite article.[5] Article The and that are common developments from the same Old English system. In Middle English, these had all merged into þe, the ancestor of the Modern English word the.[6] Geographic usage An area in which the use or non-use of the is sometimes problematic is with geographic names: notable natural landmarks – rivers, seas, mountain ranges, deserts, island groups (archipelagoes) and so on – are generally used with a "the" definite article (the Rhine, the North Sea, the Alps, the Sahara, the Hebrides).

The is the most frequently used word in the English language; studies and analyses of texts have found it to account for seven percent of all printed English-language words.[1] It is derived from gendered articles in Old English which combined in Middle English and now has a single form used with pronouns of any gender.[a] The word can be used with both singular and plural nouns, and with a noun that starts with any letter. ^ "Using 'the' with the Names of Countries". Countries and territorial regions are notably mixed, most exclude "the" but there are some that adhere to secondary rules: derivations from collective common nouns such as "kingdom", "republic", "union", etc.: the Central African Republic, the Dominican Republic, the United States, the United Kingdom, the Soviet Union, the United Arab Emirates, including most country full names:[8][9] the Czech Republic (but Russia), the Russian Federation (but Monaco) (but Monaco), the State of Israel (but Israel) and the Commonwealth of Australia (but Australia).[10][11][12] countries in a plural noun: the Netherlands, the Falkland Islands, the Faroe Islands, the Cayman Islands, the Philippines, the Comoros, the Maldives, the Seychelles, Saint Vincent and the Grenadines, and The Bahamas. Ukraine is occasionally referred to as the Ukraine, a usage that was common during the 20th century, but this is considered incorrect and possibly offensive in modern usage.[14] Sudan (but the Republic of the Sudan) and South Sudan (but the Republic of South Sudan) are written nowadays without the article. Formerly e.g. Bath, Devizes or White Plains.[7] generally described singular names, the North Island (New Zealand) or the West Country (England), take an article. Some place names include an article, such as the Bronx, The Oaks, The Rock, The Birches, The Harrow, The Rower, The Swan, The Valley, The Farrington, The Quarter, The Plains, The Dalles, The Forks, The Village, The Village (NJ), The Village (OK), The Villages, The Village at Castle Pines, The Woodlands, The Pas, the Vatican, The Hyde, the West End, the East End, The Hague, or the City of London (but London). New Zealand English. Singular derivations from "island" or "land" that hold administrative rights – Greenland, England, Christmas Island and Norfolk Island – do not take a "the" definite article. Old English had a definite article se (in the masculine gender), seo (feminine), and þæt (neuter). A Course in Phonetics (6th ed.). Pronunciation in most dialects, "the" is pronounced as /ðə/ (with the voiced dental fricative /ð/ followed by a schwa) when followed by a consonant sound, and as /ði/ (homophone of pronoun thee) when followed by a vowel sound or used as an emphatic form.[2] Modern American and New Zealand English have an increasing tendency to limit usage of /ði/ pronunciation and use /ðə/, even before a vowel.[3][4] Sometimes the word "the" is pronounced /ði/, with stress, to emphasise that something is unique: "he is the expert", not just "an" expert in a field.
